## MLDS Research Series

May 17, 2024

*The research reported here was supported by the [Institute of Education Sciences](#), U.S. Department of Education, through Grant R305A210031 to the University of Maryland, College Park. The opinions expressed are those of the authors and do not represent views of the Institute or the U.S. Department of Education. The research was prepared by members of the Research Branch of the [Maryland Longitudinal Data System Center \(MLDSC\)](#). The Research Branch would like to thank the entire staff of the MLDSC for their assistance and support.*

# Motivation from the Literature

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

## 1. Critical **shortage** of teachers and **imbalanced** teacher-student race ratio

(e.g., Schwartz et al., 2022; Sutcher et al., 2016)

## 2. **Benefits** of teacher-student race/ethnicity-matching on student outcomes

(e.g., Dee, 2004; Easton-Brooks, 2019; Goldhaber and Hansen, 2010; Harbatkin, 2021; Holt and Gershenson, 2015; Lindsay and Hart, 2017; Blazar, 2021; Blazar and Lagos, 2021; Gottfried et al., 2021; Shirrell et al., 2021; Gershenson et al., 2019)

## 3. **Early exposure to teaching** in high school might help **expand teaching pathway** overall, as well as **decrease barriers to entry** that could be particularly important for individuals of color

(e.g., Goings et al., 2018; Goings & Bianco, 2016; White et al., 2013)

However, the causal evidence is quite limited

EDUCATION

MARYLAND EQUITY  
PROJECT

## PILLAR 2

### HIGH-QUALITY AND DIVERSE TEACHERS AND LEADERS

Highly qualified and well-prepared teachers and leaders who reflect a school's population enable all students to perform at their highest level.

## The Expected Outcome

Maryland has a high-quality and diverse teacher and leader workforce that:

- approximates the diversity of Maryland students statewide and by district;
- is sufficient to fill all needed positions and roles in schools and districts across the State; and
- provides teachers with professional learning opportunities to improve student outcomes and additional responsibility, authority, status, and compensation as they gain expertise.

## Pillar Goals

- Teacher preparation candidates and graduates increasingly reflect the diversity of students in the State, and by 2032 these candidates approximate that diversity, are in sufficient supply to meet Maryland's workforce needs, and meet new rigorous graduation standards.
- Teacher preparation graduates—including student groups and across programs — are licensed at an increasingly high rate (although there may be an initial dip when the new, more rigorous licensure tests are introduced) and following full implementation of the Blueprint in 2032 all graduates meet rigorous standards and earn licensure.
- The supply of highly qualified and diverse teachers increasingly meets demand statewide and by district, including for high needs (low performing, high concentration of poverty) schools and for new roles in schools (such as mentoring of new teachers) and meets demand by 2032.

# Data and Sample

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

We use Maryland statewide data from public websites (TAM rollout) and the Maryland Longitudinal Data System (MLDS), which **links student student records over 11-year period** for 5 cohorts of entering 9<sup>th</sup> graders (SY 08-09 to 12-13).

Data sources include:

- ❖ **K12 data** from MD State Department of Education
- ❖ **College data** from MD Higher Education Commission and National Student Clearinghouse
- ❖ **Teacher employment data** also from State Department of Education
- ❖ **Wages** from Unemployment Insurance records from MD Department of Labor

# *Descriptive* Research Questions

---

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

Where along the pathway from high school to career are **barriers to entry highest** for prospective teacher candidates of color?

What is the (likely) **magnitude of policy impacts** that we would need to see for these barriers to be reduced and **to create a more demographically diverse teacher workforce**?

# *Causal* Research Question

---

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

Does the **Teacher Academy of Maryland (TAM)** high school program impact students' likelihood of **entering and advancing along the pathway into teaching?**

Are the **impacts large enough** to meet benchmarks from our data simulation?

---

COLLEGE OF

PROJECT

What is

?

# Teacher Academy of Maryland

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

- ❖ State-sponsored Career and Technology Education (CTE) program of study, that includes 4 courses
- ❖ Dual-enrollment sequence where students can earn college-level credits
- ❖ **Goal:** To prepare more high school students for the education profession
- ❖ **Theory of action:** Early exposure to teaching profession might increase students' likelihood of entering the teaching pathway, as well as decrease barriers to entry including up-front costs.

# Teacher Academy of Maryland

# TAM Effects on Quarterly Earnings at Age 25

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

- 15% boost in wages for Black girls
- No change for White girls, but also notable that estimate is not negative

# Summary of Findings and Next Steps

COLLEGE OF  
EDUCATION

MARYLAND EQUITY  
PROJECT

## Good News!

1. Meaningful effects on teaching outcomes concentrated amongst Black and White girls
2. Large effects on wages, particularly for Black girls, countering prevailing narrative that teaching is a bad career option financially

## Areas for Continued Work

4. Mechanisms and pathways differ between Black and White girls
5. Low take up amongst other groups underrepresented in teaching (i.e., Black boys, Hispanic girls and boys).
6. Effects likely not large enough to shift teacher demographics substantially, but potential for expansion in Prince George's County and Baltimore City.
7. Need for additional partners! Right now, UMD does not accept TAM credits (though there are efforts to change that)
