

# DUAL ENROLLMENT IN MARYLAND 2019-2020

## Introduction

Dual enrollment refers to any broad array of programs and opportunities that allow high school students to enroll in and take college courses. This includes programs in which students are enrolled in a dual enrollment course through a partnership agreement with their local school system and thereby receive both high school and college credit. Dual enrollment also occurs when high school students independently enroll in courses at a college and only earn college credits.

State law, requires the MLDS Center to report on:

1. The number of students who are dually enrolled;<sup>1</sup> and
2. The number and course name of the courses in which a student dually enrolls at the high school and at the public institution of higher education.

## REQUIRED REPORTING

In prior years, the above requirement was fulfilled by the *Annual Dual Enrollment Report*. However, recent legislation changed that requirement from a report to “easy-to-understand graphic data dashboards.” Accordingly, the following graphic data dashboards are in fulfillment of this requirement:

1. Number of students who are dually enrolled; and
2. Courses in which students are enrolled.

## OTHER DUAL ENROLLMENT RESOURCES

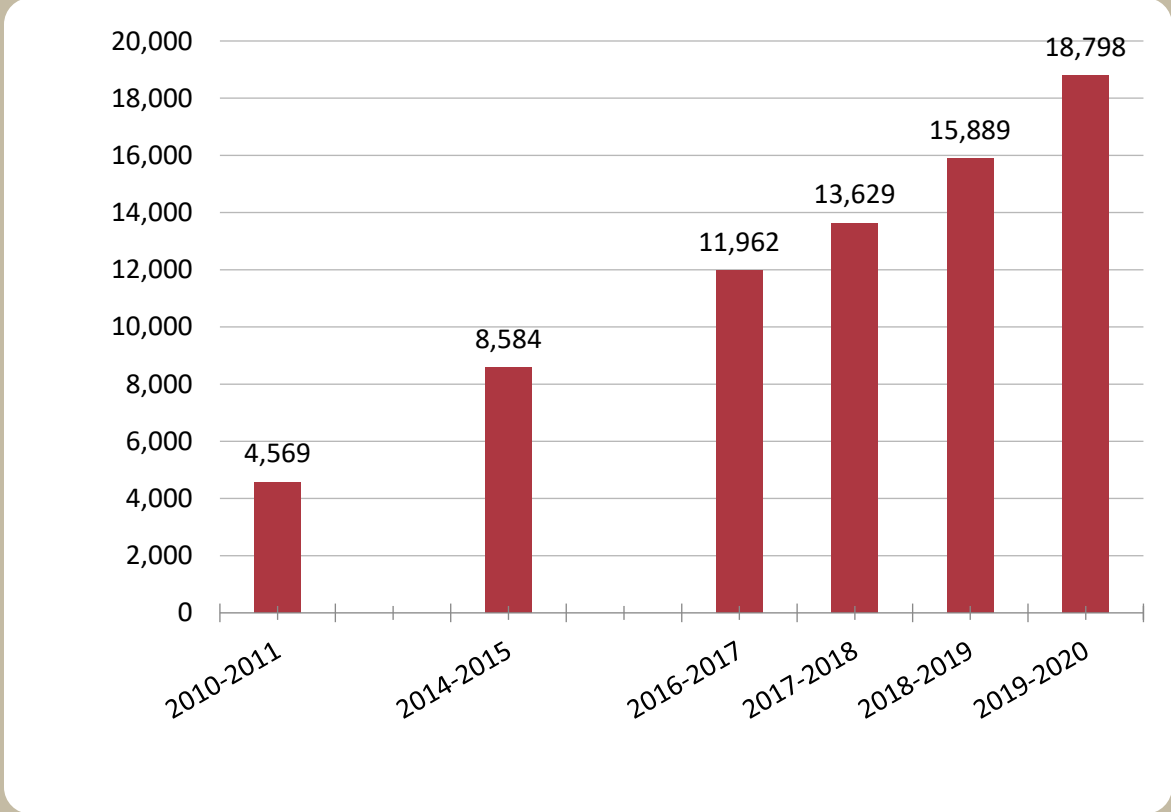

In addition to this report, the MLDS Center provides a lot of additional information on Dual Enrollment.

1. Dual Enrollment Dashboards – These series of dashboards provide information on dually enrolled Maryland public high school students.
  - a. [Statewide Dual Enrollment Trends](#)
  - b. [County Dual Enrollment Trends](#)
2. [Dual Enrollment Reports](#) - Prior Years (2013-2020)
3. Research Reports
  - a. [The Effect of a Dual Enrollment Tuition Subsidy for Students Eligible for Free/Reduced Price Meals: Evidence from CCR-CCA in Maryland](#)
  - b. [The Effects of Dual Enrollment on College and Workforce Outcomes](#)

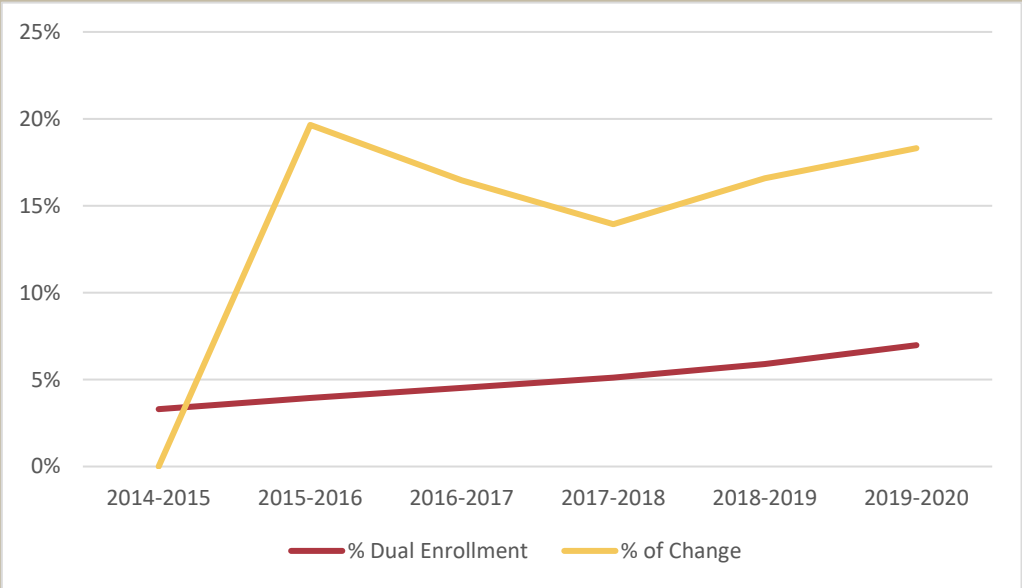

## Number of Students Who Are Dually Enrolled

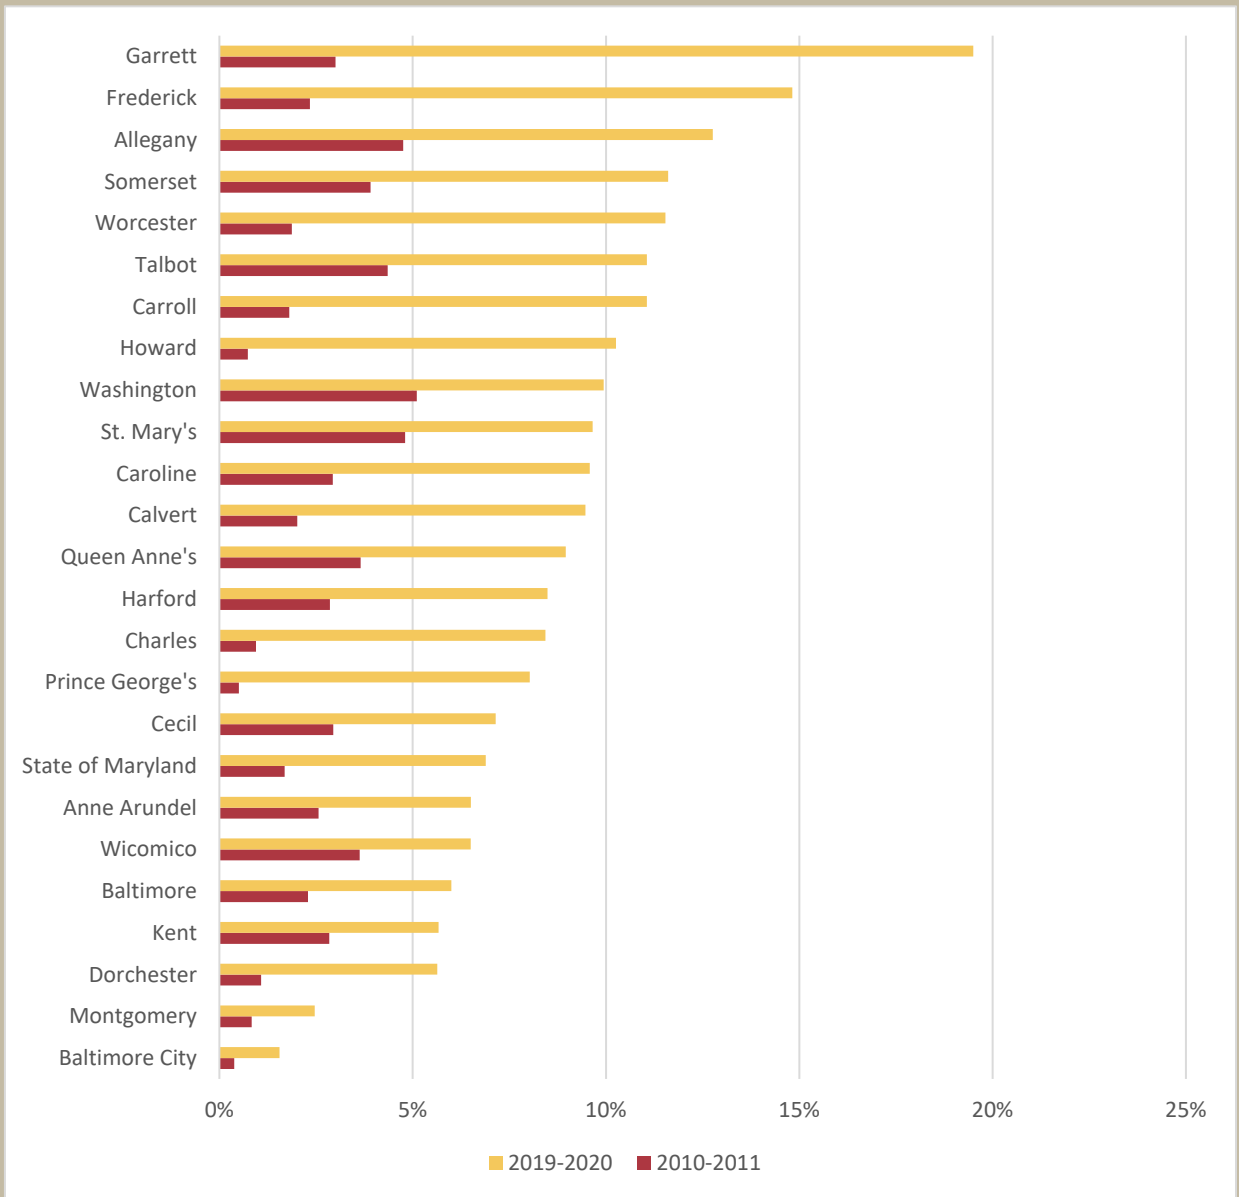

**Statewide** - The chart below shows dual enrollment participation by Maryland high school students, beginning in academic year 2010-2011 through 2019-2020. There has been a steady increase in dual enrollment participation since academic year 2010-2011, likely due to the introduction of the College and Career Readiness and College Completion Act of 2013.

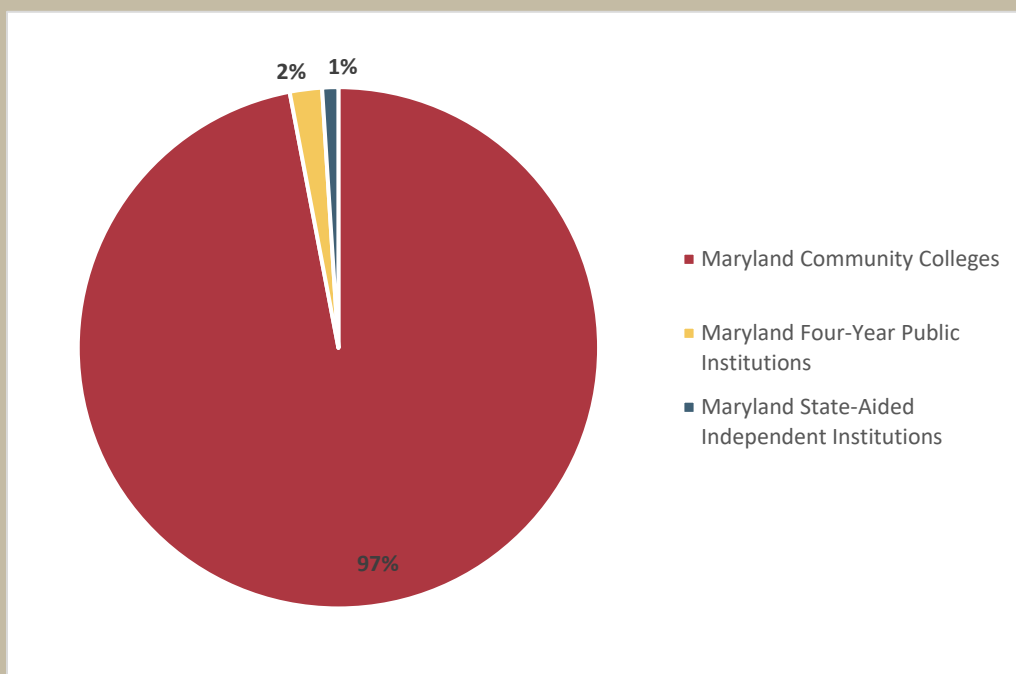

This next chart shows the percent of dually enrolled high school students (red line) 2014-2015 through 2019-2020 and the percent of change (yellow line) from the prior year.

**Local School Systems** - All school systems in Maryland participated in dual enrollment, although the rate of participation varied widely. This next provides the percentage of dually enrolled students by school system for 2010-2011 and 2019-2020.<sup>2</sup>

**College Type** - This last chart shows the college segment in which high school students were dually enrolled in academic year 2019-2020.

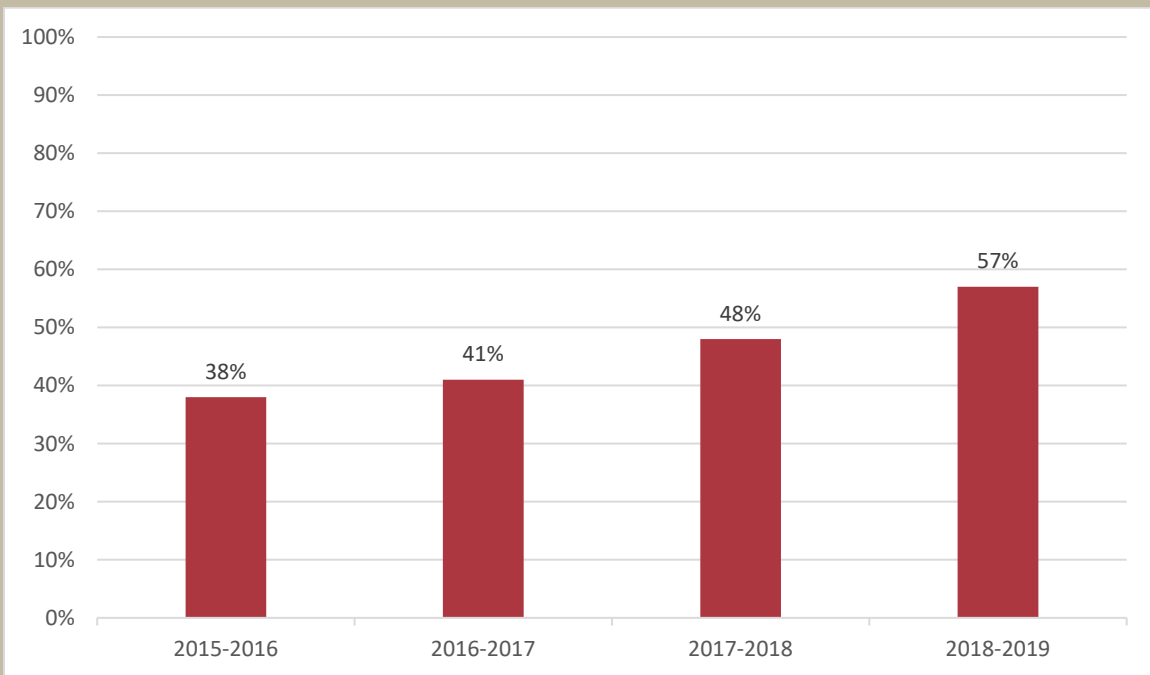

# DUAL ENROLLMENT IN MARYLAND 2019-2020

## Course Information

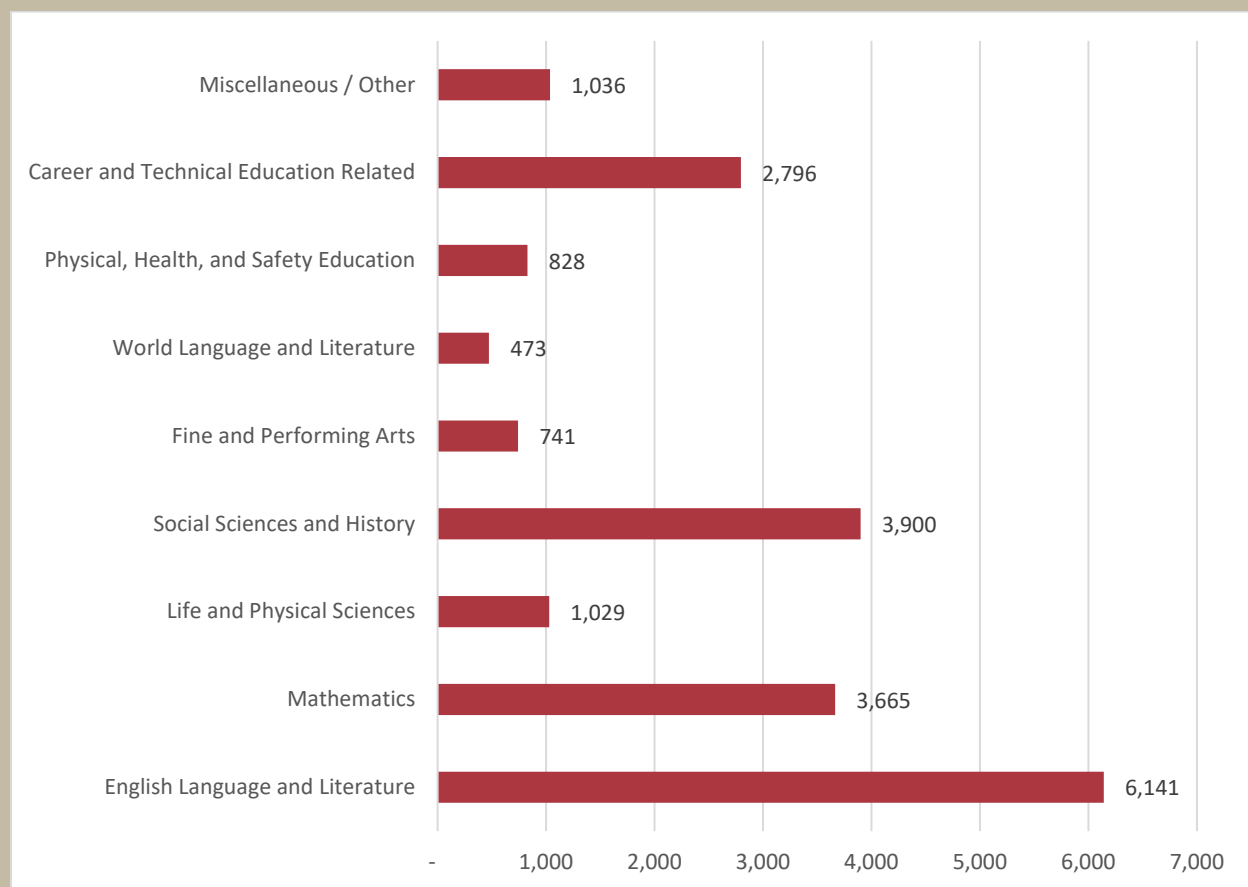

**Reporting** - There are two sources of course information for dually enrolled students:

1. *High school Course Information* - High school course information is available from the Maryland State Department of Education (MSDE) for students who dually enrolled through a partnership agreement with the local school system, provided the local school system identified the course as a dual enrollment course.
2. *College Course Information* - College course information from the Maryland Higher Education Commission (MHEC) is not yet available. MHEC began collecting course information from colleges in 2014 and the data were approved for inclusion in the Center’s data inventory last year. At this time, the data are still be analyzed and loaded into the MLDS.

The chart below shows the percentage of Maryland’s dually enrolled students that had a course that was identified as a dual enrollment course by a local school system. While course reporting will never equal 100%,<sup>3</sup> the increasing percentage of reporting shows that school systems are doing a better job at identifying reporting courses that were taken through partnership agreement.

**Course Subjects Overview** - Courses are classified using the School Courses for the Exchange of Data (SCED) classification system. The chart below provides data on the total number of dually enrolled students by SCED across all school systems. There are 18 SCED subject areas. Reported here are the most common subject areas for dual enrollment courses. The remaining SCED subjects were grouped together as a “Miscellaneous/Other” subject area.

**Course Subjects – Complete Listing** - The next pages provide a complete list of course numbers, subject areas, and names for all dual enrollment courses by local school system for 2019-2020.

## Notes

<sup>1</sup>The CCR-CCA (Md. Code, Ed. Art. §18-14A-01) defines dual enrollment broadly. “Dually enrolled student” means a student who is dually enrolled in:

- a. A secondary school in the State; and
- b. An institution of higher education in the State.

The MLDS Center does not have the data necessary to fully report on dual enrollment as defined by CCR-CCA. Instead, for the purposes of this report, dual enrollment was defined broadly as students who:

- a. Had overlapping enrollment dates in a Maryland public high school and a Maryland institution of higher education (hereinafter “college”); and
- b. Were enrolled in the college for at least one day.

<sup>2</sup>The SEED School of Maryland is reported in Baltimore City total due to the small size of the populations.

<sup>3</sup>Some dually enrolled students take courses in the summer. Those courses are not considered dual enrollment by MSDE and thus would not be coded. In addition, a student could dually enroll not pursuant to a partnership agreement.
